# Segmental review

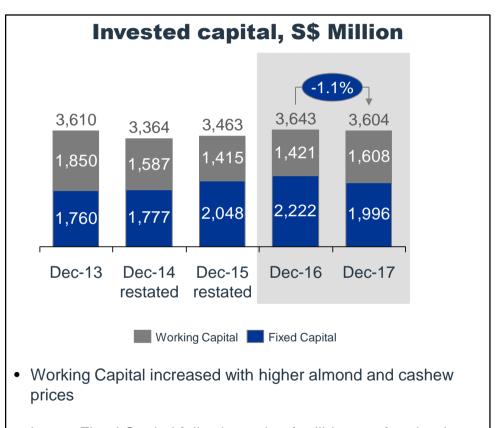

## **Edible Nuts, Spices & Vegetable Ingredients**

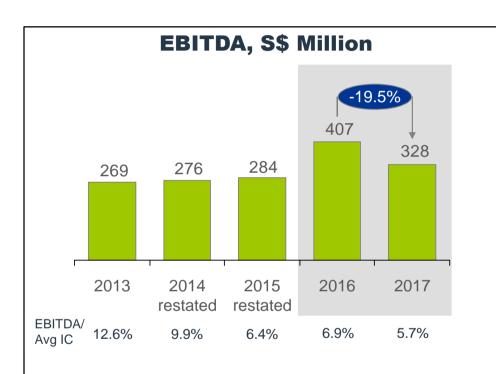

- EBITDA up as Edible Nuts performed strongly as compared with 2016 when it was impacted by depressed almond prices
- Restructuring measures underway in Olam Tomato Processors to address cost and product mix issues

 Lower Fixed Capital following sale of edible nuts farmland assets in the US

## **Confectionery & Beverage Ingredients**

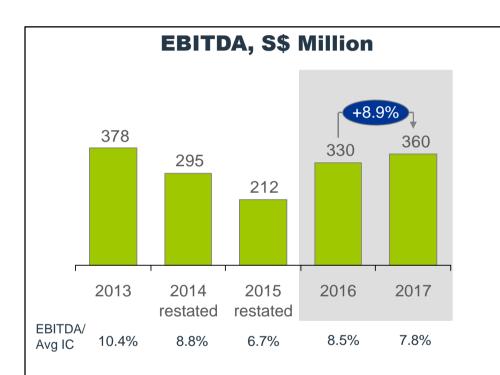

- EBITDA declined due to significantly lower Coffee contribution which was adversely affected by tough market conditions and short crop across major origins
- Cocoa processing did well throughout the year; supply chain and products trading businesses saw margins stabilise in Q4 2017

 Working Capital reduced on account of optimisation initiatives and lower cocoa and coffee prices

## Food Staples & Packaged Foods

 Improved EBITDA driven by grains milling, animal feed, Rice and Dairy, partly offset by lower contribution from Edible Oils, Sugar and Packaged Foods

 Higher Fixed Capital due to construction of animal feed mills and hatchery in Nigeria, expansion of wheat milling capacity and continued investments in upstream palm in Gabon

# Industrial Raw Materials, Ag Logistics & Infrastructure

 Improved EBITDA due to Cotton and GSEZ post commissioning of new ports and partial sale of port concession rights in Gabon, offset by lower contribution from Wood Products

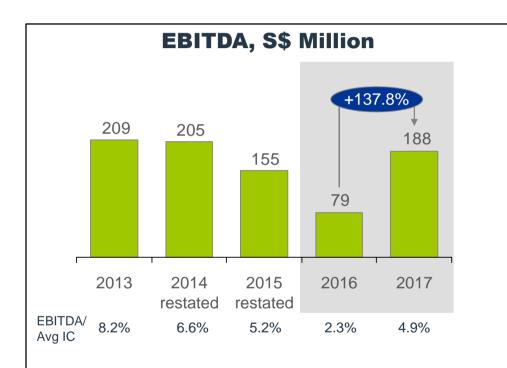

# Value chain review

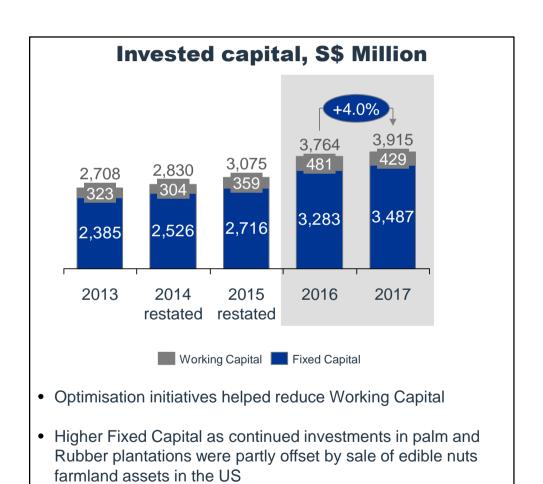

## **Upstream**

 EBITDA up on stronger contribution from almonds, better yields in Dairy and Grains farming in Russia, and Rice farming in Nigeria

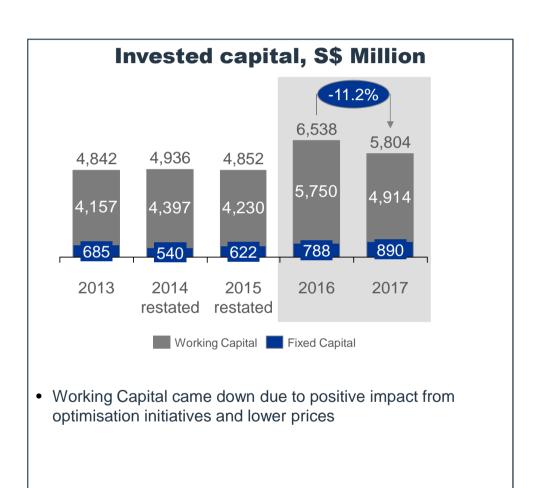

## **Supply chain**

 EBITDA declined due to lower contribution from Coffee supply chain, Cocoa bean trading and Sugar trading

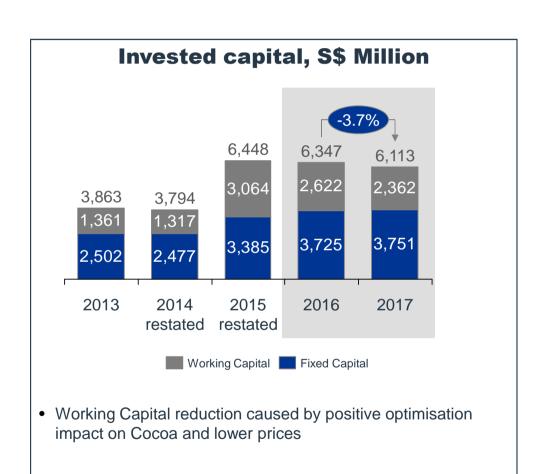

### Mid/Downstream

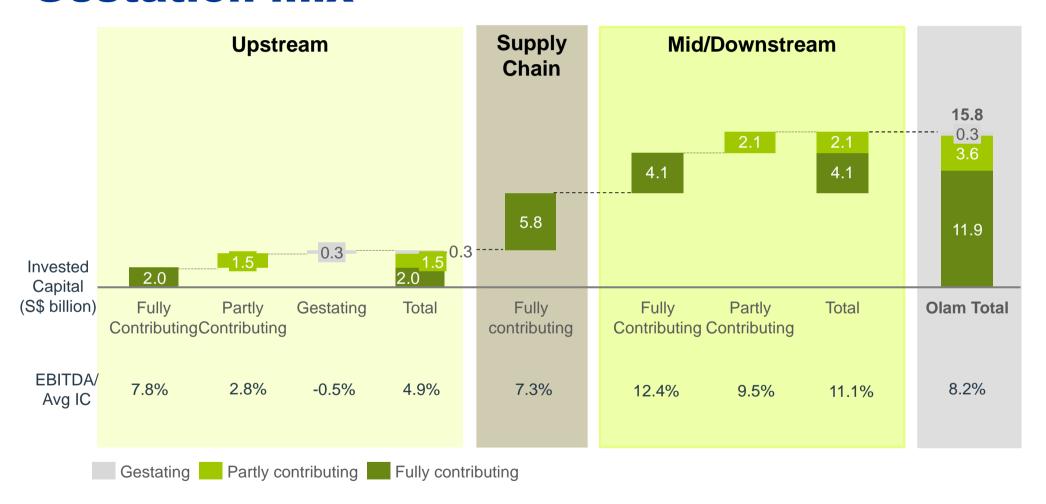

- Improved EBITDA as a result of higher contribution from wheat milling in West Africa, peanut processing in the US (full-year consolidation of results from Brooks) and GSEZ
- This was partly offset by weaker contribution from tomato processing and Packaged Foods in Nigeria

## **Gestation mix**

# Strategic Plan update

# **Turning around underperforming assets**

- Dairy farming in Uruguay continued to report improved financial and operating results
- Rice farming in Nigeria completed its restructuring and started to report better results from H2 2017

- Packaged Foods restarted production of beverages in Q3 2017; strategy refresh to address issues such as product differentiation, branding, distribution and cost undertaken during the year
