

Olam International Limited

FSC®– COC Operations Procedures

Version 4.01

Valid from 01/05/2019 to 30/04/2020

Darshan Raiyani, Department Head Wood Products
Antoine Briane, Management Representative for the FSC®-COC system

Company Profile

Olam International is a **leading global integrated supply chain manager** of agricultural products and food ingredients, sourcing 47 products with a direct presence in 70 countries and supplying them to over 16,200 customers. With direct sourcing and processing in most major producing countries for our various products, we have built a global leadership position in many of our businesses, including coca, coffee, cashew, sesame, rice, cotton and wood products.

Olam International is a leading agri-business operating across the value chain in 70 countries, supplying various products across 16 platforms to over 16,200 customers worldwide. From a direct sourcing and processing presence in most major producing countries, Olam International has built a global leadership position in many of its businesses. Headquartered in Singapore and listed on the SGX-ST on February 11, 2005, Olam International currently ranks among the top 50 largest listed companies in Singapore in terms of market capitalisation. In 2016 Fortune recognised Olam International at #23 in its 'Change the World' list.

Our commitment to responsible forest management

Our Environment and Responsible Forest Management initiatives are closely aligned with our core purpose of Growing Responsibly and aimed at making a meaningful social impact in the communities in which we operate. We are committed to the responsible management of our supply chains from farm to customer.

[\[See Annex 1 – Environment and Sustainability Policy\]](#)

Olam International Ltd.'s Singapore trading office is a **FSC® COC certified entity**. The certificate only covers the trading activities of Olam international's trading office in Switzerland, registered as **tt Timber International AG**. [\[See Part 8. Outsourcing\]](#)

Olam international also maintains Forestry Management Certificates through its wholly owned company, **La Congolaise Industrielle des Bois (CIB)** in the Republic of Congo.

Suppliers' certificates validity will be controlled by the management representative **at least once a year**, one month before the audit date. It is also of its responsibility to update it, should it change before the annual control date.

FSC®-COC Standard

Olam International Ltd. FSC-COC certificate is covered by the FSC-COC Multisite standard (FSC-STD-40-003 V2-1). Sites are defined as following:

Central site

Address: tt Timber International AG
Aeschengraben 6, 4054 Basel, Switzerland

Contact details: Antoine Briane
antoine.briane@olamnet.com

Other sites

Address: Olam international Ltd.
7 Straits View, Marina One East Tower, #20-01, Singapore 018936

Contact details: Antoine Briane
antoine.briane@olamnet.com

According to FSC's standard, it's the certification body – SGS Singapore – that is auditing and verifying the various sites on both internal and external compliance.

In the event of addition of a new site, Olam's representative would have to inform the certification body to make sure the site is compliant with the current FSC-COC certificate standards.

FSC®-COC Objective

To meet FSC® standards, maintain customers' rights, support environmental protection & responsible forest management

Olam is fully committed to comply with the values of FSC® as defined in the "Policy for the Association of Organizations with FSC®" (FSC®-POL-01-004, initially approved in July 2009). This is actively practiced through its actions by maintaining FM and CoC Certifications.

In addition Olam International is actively involved in FSC® decision making, being a **FSC® member in the Economic Chamber**.

Olam implements the necessary measures to continuously ensure we are not directly or indirectly involved in the following activities:

- Illegal Logging or the trade in illegal wood or forestry products
- Violation of traditional and human rights in forestry operations
- Destruction of high conservation values in forestry operations

- Significant conversion of forests to plantations or non-forest use
- Introduction of genetically modified organisms in forestry operations
- Violation of any of the ILO Core Conventions, as defined in the ILO Declaration on Fundamental Principles and Rights at Work, 1998

Olam is also fully committed to occupational health and safety. The MATS Department is in charge of setting and implementing Health & Safety policies within the Olam International Group. Please refer to Website <http://www.olamconnect.com/mats/default.aspx> to learn more about their role.

[\[See Annex 2 – Health and Safety Policy\]](#)

Note: there is strictly no physical handling of the products by Olam's Singapore office.

1. Purpose of the handbook

The purpose of this handbook is:

- To ensure the current documentation process control systems meet FSC®-COC requirements
- To make sure that our FSC® marked products coming from the FM certified sources comply with the Chain of Custody requirement mandated by the FSC® Standard
- The process control system is also made ready to identify and trace the entire chain of custody as and when required for any internal or external audit
- To ensure all Participating Sites under the scope of certificate are aware of Olam International Ltd. policy and procedure regarding FSC®-COC requirements

2. Scope of the Handbook

The scope of this handbook is:

- Outlining Olam International Ltd., Singapore's office's documents control processes related to the FSC®-COC standard and maintaining FSC® products claims through the process of transfer of ownership in Purchase and Sale of FSC® Certified products
- Outlining the responsibilities and fixing accountability for each step of traceability in the Chain of Custody control process
- Detailing FSC® product groups for all products that will be purchased and sold
- Defining the Chain-of-Custody System applicable to our trading activities

3. Olam International COC Supply Chain Process Scenarios

Olam International Ltd. only uses the transfer system, as described in FSC Standard for Chain of Custody certification – FSC-STD-40-004 V2-1).

We identified three potential Scenarios with reference to Supply Chains that would involve Olam International Ltd's COC Certificate under the Transfer System.

Note: Transfer System is a Chain of Custody system applied at the product group level, which allows outputs to be sold with an FSC® claim that is identical to the material category. In this case there will be no handling of physical products.

3.1. First Scenario

Own FSC® FM Certified Forest → Olam International Ltd. → Buyer.

3.2. Second Scenario:

3rd Party FSC® Supplier → Olam International Ltd. → Buyer

3.3. Third Scenario

3rd Party FSC® Supplier → Olam International Ltd. Procurement Office → Olam International Ltd. → Buyer

The Transfer System is used for Olam International trading activities. All original FSC® claims are transferred as is to buyer/end user.

As such, we could transfer following FSC claims:

- FSC® 100% product groups
- FSC® Mix product groups
- FSC® Controlled Wood product groups

In this scheme, it is important to note that there is strictly no transfer of ownership and no introduction of new material inputs, even in cases where production/processing of the cargo is undertaken during the process of transport to the end buyer. (Where processing itself will be outsourced)

4. Organization Structure and Management Responsibilities

As responsible forest management is an important part of Olam environmental policy, issues regarding certification have the support of senior management and supervisory board. Group wide sustainability issues are overseen by the CRS Board and CRS executive committees, which includes Olam International's president and global head for the wood division.

(More information on: <http://olamgroup.com/sustainability/governance/>)

Antoine Briane has been appointed as Olam International Ltd.'s Management Representative for the FSC®-Chain of Custody System.

(See Annex 3 – Authorization Letter)

4.1. Responsibilities of the Company's Management Representative

Olam International's Management Representative's responsibilities are:

- a) Overall responsibility for Singapore's office and related contractors/agents compliance with all applicable requirements of this standard
- b) Set up, implement and maintain procedures and/or work instructions covering all applicable requirements of this standard
- c) Establish a FSC® Product Groups List for all products that will be sold with FSC® claims which will define the scope of the FSC® certificate and ensure this list is publicly available and kept up-to date at all time. This list shall consist of the following information:
 - a. Specification of the product group as FSC® 100%, FSC® Mix, FSC® Controlled Wood
 - b. Product Type(s) according to the FSC® product classification
 - c. Species (scientific and commons names)

Note: to ensure correct scientific and common names are used, our company will follow the available nomenclature of the Germplasm Resources Information Network (GRIN) Taxonomy Species Online Database (<http://www.ars-grin.gov/cgi-bin/npgs/h®l/index.pl>).

Products not listed in this product group list cannot be sold as FSC® certified products. In case Product Groups need to be added, Olam International shall contact and get approval from FSC® Certification body prior to sales. Any changes are therefore subject to approval from the Auditor who will authorize as well to insert the same on the FSC® Website.

[\[See Annex 4 – Olam International FSC® Product Group List\]](#)

- d) Identify training needs and subsequently organise training sessions, according to the following training plan: arrange training sessions at least once a year
- e) Conduct regular internal audits through random spot checks by checking the relevant departments to ensure the procedures are implemented and maintained as outlined in this document
- f) Keep an updated database of Olam International FSC® certified suppliers in which the following records would be maintained:
 - a. Supplied product type
 - b. Supplied material category
 - c. Supplied FSC®-COC or FSC®-CW code (if applicable)
 - d. Validity of the certificate at the time of the purchase contract

Contact details

tt	Timber	Aeschengraben 6	
International AG	Antoine Briane	4051 Basel Switzerland	T: +41 (0)61 205 3940

4.2. Responsibilities of the Timber Department Management

The department is responsible for the development and implementation of the FSC®-COC system across relevant functions, making sure that the system adheres to the FSC® standard and complying with the requirements of relevant laws and regulation governing FSC® Certified trade.

4.3. Responsibilities of the Marketing Department

The marketing team is responsible for the marketing of FSC® certified products, identification of COC status and for ensuring that Certificate number is mentioned on relevant Sales Documents. The marketing Department shall also closely monitor the usage of FSC® Trademark. The marketing offices never take legal ownership of the cargos. If such cases occur in future they would obtain their own COC certification and handle such cargoes according to their own procedure and outside the scope of this standard.

4.4. Responsibilities of the Documentation / Operations Department

This department ensures the FSC® standards are adhered to at all time and on a daily basis following the established procedure and making sure there is no breach in the COC Supply Chain Process. All relevant employees within the organization shall demonstrate awareness of the organization procedures and competence in implementing the organization's Chain of Custody management system.

4.5. Responsibilities of our independent agents

Olam International International Ltd, Singapore will on some occasion outsource part of the work process to independent agents. There will be strictly no transfer of legal ownership and the outsourced process will remain within the scope of Olam International's FSC®-COC certificate. However, the independent agents shall set up and maintain a documentation control system with explicit procedures for the outsourced process that are shared with Olam International's FSC®-COC Certificate and ensure they maintain traceability of FSC® certified material and paper trails. (Through records of inputs, outputs and delivery documentation associated with all FSC®-certified material which is processed under the outsourcing contract agreement)

5. Identification of Critical Control Points, Risk Assessment and controls

Important remark

It is important to keep in mind that:

- In case of FSC® 100% contracts it is the FSC®-COC No that should appear where required,
- In case of FSC® Mix contracts it is the FSC®-COC No that should appear where required,
- In case of FSC® Controlled Wood contracts it is the FSC®-CW No that should appear where required,
- In case of Non-FSC® contracts, No FSC®-COC No nor FSC®-CW No should appear.

CCPs	Risk Assessment	Controls
Suppliers Identification	Risk: – Supplier might be no longer certified – Certificate might not be valid or terminated – Supplier might make false Claim	– Carefully monitor the validity of supplier certificate on www.info.fsc.org – Check FSC® Certificate – Verify Scope
Low risk		
Purchase Orders Purchase Contract Purchase Invoice Shipping Documents	Risk: – Supplied quantities and quality differ from shipping documentation – Product Group (FSC® 100%, FSC® Mix, FSC® Controlled Wood) or FSC®-COC No or FSC®-CW No might be incorrectly used in the Purchase order/Purchase invoice or shipping documents – Product Group (FSC® 100%, FSC® Mix, FSC® Controlled Wood) or FSC®-COC No or FSC®-CW No might not appear on purchase documents which might lead to a potential breach in the Chain of Custody	– On Purchase Contracts: ▪ FSC®-COC No from FSC® supplier or FSC®-CW No. ▪ Product Group (FSC® 100%, FSC® Mix, FSC® Controlled Wood) – On Purchase Invoices: ▪ Supplied quantities and quality shall be in compliance with the supplied documentation ▪ FSC®-COC No from FSC® supplier or FSC®-CW No. ▪ Product Group (FSC® 100%, FSC® Mix, FSC® Controlled Wood)
Medium risk		– On shipping documentation:

		▪ applied quantities and quality in compliance with the purchase invoice ▪ Log List records with batch code for logs and packing list record with bundles code for sawn timber – Link between shipping documents for shall be clearly identified and verified (through common references like contract No)
Sales Orders	Risk: – Olam International's FSC®-COC No. or Olam International's FSC®-CW No. might not appear or be misused on sales invoice/contract (ex: FSC® Pure instead of FSC® 100%) – Product Group (FSC® 100%, FSC® Mix, FSC® Controlled Wood might not be specified on sales invoice/contract – FSC®-COC No from FSC® supplier or FSC®-CW might incorrectly appear on sales invoice/contract in case of non FSC® Outputs – Product Group (FSC® 100%, FSC® Mix, FSC® Controlled Wood might be incorrectly quoted on sales invoice/contract in case of non FSC® Outputs Medium risk	– In case of verified FSC®-certified material, Sales contract/Sales invoices shall imperatively quote: ▪ Olam International's FSC®-COC No. (SGS-COC-0002926) or Olam International's FSC®-CW No.(SGS-COC-002926) ▪ Product Group (FSC® 100%, FSC® Mix, FSC® Controlled Wood) Note: The certification claim shall strictly match the one indicated on Purchase contract and Purchase invoice. Note: However, in case material is not FSC certified, there shall not be any reference of any kind of the FSC®-COC/CW Nos and FSC® claims in the sales contract/invoice
Document and record control	Risk: – Evidence of adherence to FSC®-COC procedure through the process cannot be made without an efficient document and record control system Medium risk	– Monitor and control constantly documents and maintain record control system

		– Adherence to this document and record control system is done once a month by the FSC-CoC Management Representative though random spot checks on registers and records – All documentation/records for any FSC® based orders shall be retained for a period of five (5) years
FSC CoC system documentation	Risk: – FSC®-COC system in place is no longer valid or representative of Olam International's activities. – Olam International might not comply with the FSC®-COC standard anymore. – Changes might arise such as: ▪ Transfer System might be no longer valid ▪ Certificate Scope has changed (Product Group List/Categories/Claims/Species...) ▪ New Outsourced Entities have been brought in under Olam International's FSC®-COC Certificate	– The FSC®-COC representative shall frequently verify if there have been any updates for the FSC® website. In such case, he would ensure any changes are implemented and that Department Heads for Wood Products in Singapore are informed accordingly. Where necessary, further training would be provided.
Medium risk		
Conversion factors for Volume Controls	Risk: – Purchased volume/weight might not correspond to sales volume/weight – There might be a lack of transparency/understanding in the way changes of material volume or weight are calculated	– The organization has identified the main processing steps involving a change of material volume or weight due to conversion from one measuring methodology to another. This document specifies the conversion factor for the steps involved, and provides a documented methodology to calculate the conversion factors in a transparent way.
Medium risk		

		– Any new conversion factor shall be inserted to this procedure.
Labeling and Logo Approval	Risk: – There might be an infringement to the FSC®-STD-50-001 V2-0 regarding the use of the logo and trademark. Medium risk	– Olam International will establish and maintain an up-to-date a register of all the Logo/Trademark use for on/off products. – The FSC®-CoC Management Representative will oversee use of logo/trademark and ensure it always complies with the standard FSC®-STD-50-001 V2.0. – No logo/trademark use can take place without approval from the Management Representative and prior to any FSC® logo/trademark use, the Management Representative shall always seek approval from a FSC® accredited certification body.
Sales of stock / shipped and unsold FSC® certified material	Risk: – In case of shipped and unsold/stored material. there might be an increased risk in mixing up FSC® material with non-FSC® material (due to gap in time between purchase and sale) Medium risk	– Monitor closely purchase documents and stock status by regularly printing stock reports for FSC® Material – If purchase consists of FSC® certified material, sales shall consist of FSC® certified material too, adhering to all FSC® requirements – If sold non-certified, Labels on cargo shall be removed and it shall not be mentioned in sales documentation anything related to FSC® outputs (as not applicable)

Below are details of the controls we apply to mitigate the above identified risks. These have been established by OLAM INTERNATIONAL both at the Head Office and at the Marketing office(s) in order to mitigate the risks of mixing certified and non-certified products.

5.1. Supplier verification

Supplier may not be delivering FSC® material with valid claim.

Supplier verification is therefore required:

The supplier of FSC®-COC products will be a holder of either a FSC®-FM or/and a FSC®-COC Certificate.

Validity and status of the FSC® Certificates can be checked on the FSC® Website: <http://info.fsc.org/>

It is the only credible source of information for the status and validity of FSC® certificates and

Olam International shall verify the validity and scope of the supplier's FSC® certificate for any changes that might affect the availability and authenticity of the supplied products.

The above shall be checked systematically to ensure the Chain of Custody is maintained when buying FSC® materials from a supplier.

An up-to-date record of all FSC® suppliers who are supplying material used for FSC® product groups shall be established and maintained

[\[See Annex 5 – Supplier verification www.fsc.info.org – Congolaise Industrielle des Bois\]](#)

5.2. Customer verification

Sales and backoffice teams shall always controls whether the FSC-COC or FSC-CW certificate of their customer is valid before issuing a sales contract. In order to do so, they shall use an up-to-date list of their customers and their certificate (list available on the local network). Management Representative for the FSC®-COC system is responsible for keeping this list up-to-date. FSC's trademark portal (<https://trademarkportal.fsc.org/portal/login.php>) shall also be used to maintain this list up-to-date.

5.3. Controls on Purchase and Sales Contracts for FSC® certified products

Olam International requires at least the following basic information on all the **purchase** contracts:

- Name and contact details of the organization
- Name and address of the supplier
- Date when the document was issued
- Contract no.

- Product type and material category
- Marks & no. (As and when required/possible)
- Serial numbers(As and when required/possible)
- Specifications
- Volume / Quantity of the product sold
- Units and unit price

Before any FSC® purchase contract can be issued the following shall be verified:

- The FSC®-COC No or FSC®-CW No from supplier shall be indicated on all contracts for FSC® material
- Product Group must clearly be stated on all contracts: FSC® 100% / FSC® Mix / FSC® Controlled Wood
- Following text must also appear:

Product group from well-managed forests, produced in conformity with the Principles and Criteria of the Forest Stewardship Council and other controlled sources.

[\(See Annex 6 – Example of a purchase contract FSC® Material\)](#)

The **sales contract** shall indicate the following basic information:

- Name and contact details of the selling entity
- Name and address of the Buyer
- Date of the document
- Contract no.
- Product type and material category
- Marks & no. (As and when required/possible)
- Serial numbers (As and when required/possible)
- Specifications
- Volume / Quantity of the product sold
- Units and unit price

Before any sales contract is issued, the below points shall be verified:

- The Olam International FSC®-COC Registration Code: SGS-COC-002926 in the case of the sale of FSC® 100% products or FSC® Mix products shall appear

or

- The Olam International FSC® Controlled Wood Code: SGS-CW-002926 in the case of the sale of FSC® Controlled Wood products shall appear
- The claim “FSC® 100%” for products from FSC® 100% product groups shall appear
- The claim “FSC® Mix” for products for products from FSC® Mix product groups shall appear
- The claim “FSC® Controlled Wood” for FSC® Controlled Wood product shall appear

[\[See Annex 7 – Example of a sales contract FSC® Material\]](#)

5.4. Controls on Shipping Documentation:

When material is shipped, the Operations Department (both in the Head Office and in marketing offices) shall receive the following documentation from Supplier/Agent/Procurement Entity... in origin:

- Specifications / Packing List from origin
- Commercial Invoice from Supplier
- Bill of Lading
- Phyto-sanitary Certificate / Fumigation Certificate
- Certificate of origin

Documentation shall be checked as per below.

The **Supplier/Origin Commercial Invoice** shall bear:

- The FSC®-COC or FSC®-CW Certificate No from supplier as well as validity date of the corresponding certificate
- The Product Group: FSC® 100% / FSC® Mix / FSC® Controlled Wood.
- The FSC® text must be also shown:
Product group from well-managed forests, produced in conformity with the Principles and Criteria of the Forest Stewardship Council and other controlled sources

[\[See Annex 8 - Example of a purchase invoice FSC® Material\]](#)

The **Bill of Lading/Specifications/Packing list** shall bear:

- The specifications /packing list must indicate:
- The FSC®-COC or FSC®-CW Certificate No from supplier as well as validity date of the corresponding certificate
- The Product Group: FSC® 100% / FSC® Mix / FSC® Controlled Wood
- The FSC® text must be also shown:
Product group from well-managed forests, produced in conformity with the Principles and Criteria of the Forest Stewardship Council and other controlled sources.

Both the **Bill of Lading and Specifications/Packing List** shall be clearly **linked** by a common reference (ex: state the contract no. from origin as a common reference that would link the documentation and therefore cargo is fully identified and traceable.)

Note: The Certificate of Origin and Phyto-Sanitary Certificate are also linked to other documents through origin contract no.

[\[See Annex 9 – Example of a Bill of Lading / Annex 10 – Example of a Packing List-Specifications / Annex 11 – Example of a Phyto-sanitary certificate\]](#)

5.5. Sales Invoice

Given the fact all these checks are duly completed and successful and no breach in the Chain of Custody is found, we shall then issue a **Sales invoice** outputs sold with FSC® claims including the following information:

- Name and contact details of the organization
- Name and address of the customer
- Date when the document was issued
- Contract no.
- Product type and material category
- Marks & no. (As and when required/possible)
- Serial numbers(As and when required/possible)
- Specifications
- Volume
- Units and unit price

Operations Department will ensure that delivered FSC® quantities match with the quantities on the corresponding supplier invoice.

The **Sales invoice** shall additionally state for outputs with FSC® claims:

- The Olam International FSC®-COC Registration Code: SGS-COC-002926 in the case of the sale of FSC® 100% products or FSC® Mix products
- or
- The Olam International FSC® Controlled Wood Code: SGS-CW-002926 in the case of the sale of FSC® Controlled Wood products
 - The claim "FSC® 100%" for products from FSC® 100% product groups
 - The claim "FSC Mix Credit" or "FSC Mix XX%." for products for products from FSC® Mix product groups under a credit system, according to the supplier's invoice
 - The claim "FSC® Controlled Wood" for FSC® Controlled Wood product

Important Note: if the output is sold FSC® certified, the claim shall be identical as on the purchase invoice as OLAM INTERNATIONAL uses the transfer system.

The product sold shall be therefore clearly identified as FSC® certified material on the invoice.

[\[Annex 12 – Example of a Sales invoice FSC® Material with claim "FSC 100% claim"\]](#)

5.6. Conversion factors

Olam International has identified certain conversion factors for use in cases where the measurement methodology is changed. The conversion factors are set as follows:

Equivalence cbm and Hoppus Tons for all Products Group

Purchase in cbm / sales in Metric Tons for Ebony Specie ONLY (Scientific Name: Diospyros Crassiflora/119a)

Olam International will purchase Ebony wood product based on the volume in cubic meters as per usual. However, whenever sale is agreed in sales contract in Metric Ton unit, Olam International will base the sales calculation on actual statistic weight value indicated on the **specification** received from supplier and this value will be the only source allowed for the sale quantity.

These conversions factors shall be revised on regular basis and kept up-to date.

Olam International will ensure to identify new conversion factors for new trade lines or new requirements.

5.7. Issues relative to verification of Critical Control Points: Complaints

In the event of a complaint is received regarding the organization's conformity to the requirements applicable to the scope of Olam International's CoC certificate, the management representative should be immediately informed. This person shall then ensure that the complaints are adequately considered, including the following:

- a) Acknowledge receipt of the complaint to the complainant within two (2) weeks of receiving the complaint
- b) Investigate the complaint and specify its proposed action in response to the complaint within three (3) months. If more time is needed to complete the investigation, the complainant and Olam International's certification body should be notified
- c) Take appropriate actions with respect to complaints and any deficiencies found in processes that affect conformity to the certification requirements
- d) Notify the complainant and Olam International's certification body when the complaint is considered to be successfully addressed and closed.

5.8. Issues relative to verification of Critical Control Points: Non-compliance

In the case of, despite all the controls and procedure, non-conforming products are detected after they have been sold and delivered, Olam International shall undertake the following activities:

- a) Notify its certification body and all affected direct customers in writing within five business days of the non-conforming product identification, and maintain records of that notice
- b) Analyse causes for occurrence of non-conforming products, and implement measures to prevent their reoccurrence
- c) Cooperate with its certification body in order to allow the certification body to confirm that appropriate actions were taken to correct the non-conformity.

6. FSC®-CoC Logo Usage and Protection.

The FSC® logo shall be used in accordance with the standard FSC®-STD-50-001 V2-0. According to above standard, we will apply the FSC® trademarks only after we get our own FSC®-COC certificate number, no matter which ways we need to use the FSC® Trademarks and Labels. Furthermore, we will not use any FSC® trademarks to any promotion of our certified products until we have actual certified product sales at our end.

Olam International will establish and maintain an up-to-date a register of all Logo use for on/off products. The use of logo of the relevant certification scheme is managed by the Management Representative and shall always comply with the standard FSC®-STD-50-001 V2.0. No logo use can take place without approval from the Management Representative and prior to any FSC® logo use, the Management Representative shall always seek approval from a FSC® accredited certification body.

We would use the FSC® Trademarks, Labels, Logo as described below:

- A. On-product use
 - FSC® labels to be used on the Packing & Packaging of logs and sawn timber
 - FSC® labels to be used on logs and sawn timber
- B. Off-product use
 - Use of the FSC® Trademarks on stationary, email signatures
 - To be used on sign boards of Olam International International Ltd, Singapore
 - To be used on any pamphlet, literature, books, reports or presentation made by Olam International Internatioanl Ltd.

[\(See Annex 13 – FSC® Logo use register\)](#)

Note: No FSC® label should be used on material nor documents in the case of the trade of FSC® CW material.

7. Records & Registers

Olam International as well as marketing offices and outsourced entities shall maintain complete and up-to-date records to maintain a secure Chain of Custody.

We will retain records and reports, including purchase and sales documents, training records, volume summaries and trademark approvals during (5) five years.

We will record the following documents:

- Purchase and Sales Contracts
- Purchase and Sales Invoices
- Relevant Shipping Documentation (Bill of Lading/Specifications/Packing List, Certificate of Origin, Phyto-Sanitary Certificate)
- FSC® Material Suppliers Register
- FSC® Logo Use Register
- FSC® Product Group List
- Monthly FSC® Volume Report for purchase and sales contracts

[\(See Annex 14 – Monthly FSC Volume Report Form – Purchase and Sales\)](#)

- Training Attendance Sheets
- Monthly Stock Report of unsold FSC® Material

[\(See Annex 15 – Monthly Stock Report Form on unsold FSC® Material\)](#)

Olam International has a computerized system for storage of documentation dated a year or older. Electronic Records are backed up monthly. These records are stored in hard copy, easily available and stored off site. Also, reports and records are easily extracted from our internal system under ORACLE – OPS.

8. Outsourcing

Olam International Ltd.'s Singapore trading office is a **FSC® COC certified entity**. The certificate only covers the trading activities of Olam international's trading office in Switzerland, registered as **tt Timber International AG**. [\[See Part 8. Outsourcing\]](#)

Olam international also maintains Forestry Management Certificates through its wholly owned company, **La Congolaise Industrielle des Bois (CIB)** in the Republic of Congo.

The FSC® - certified material can be **tracked and controlled**.

Olam International's subsidiaries above mentioned keep **records of inputs, outputs and documentation associated with all FSC®-certified material** that is handled by them.

The system used for outsourcing work through these entities remains **the transfer system** as the work implies handling of documentation without processing/production of the inputs. There will be no transfer of ownership of FSC® certified material to these companies.

Our certification body will be immediately informed with the names and contact details of any additional outsourcing organizations that Olam International would wish to add.

[\[See Annex 16 – Chain of Custody Certification Outsourcing Agreement Example\]](#)

9. Training

When Moray McLeish joined Olam International in 2016, he was fully trained in relevant areas.

Antoine Briane is designated as the Management Representative for the FSC®-COC system for the Basel Office.

He was initially trained when he joined the team in September 2015 on FSC® Standards Procedure and handling of documentation for FSC® Certified inputs/outputs by Mr Wolf Kühns.

The Management Representative shall identify the training needs and arrange FSC® related training for new staff members.

Olam International's employees based at tt Timber in Basel (Outsourced Olam International subsidiary) were trained on 11/08/2011 in Olam international Ltd., Singapore on FSC® procedures and requirements.

The current Timber Team is competent in daily FSC® material documentation handling and understands their specific responsibilities in the control of the Chain of Custody. A separate training program was arranged on 20th July 2012 for all employees dealing with FSC® certified material who could not attend the session in Singapore. Every employee who joined the team since has been trained in Basel.

Antoine Briane did a refresher internal training course on the 28th of September, 2016 to relevant employees of tt Timber International. Attendants were asked to sign an attendance sheet after the course.

[\[See Annex 17 – Attendance Sheet – COC Certification training Report\]](#)

Antoine Briane did internal and individual trainings in July 2017, when Olam International started to market its Controlled Wood production. Antoine trained Jonathan Klemme, who joined the team as a Sales manager, in January 2018.

Olam international registers training attendance sheets in hard copies as part of its procedure.

Records of training and experience will be maintained and kept up-to-date for 5 years.

10. Approval and Revision of this procedure

This procedure will be revised annually in October and will be subsequently approved and signed by the Department Head – Timber Division.

The present procedure was approved on 7th December, 2017. It will be revised again in October, 2018.

Annex 1 Olam International's Environment and Sustainability Policy

Environmental Sustainability Policy

Olam is committed to selecting and managing land responsibly, establishing landscape-level water management, and adapting to risks and opportunities for Olam and communities.

Our goals:

- Increase water use efficiency
- Minimise the impact of wastewater discharges
- Mitigate greenhouse gas emissions from Olam sites
- Reduce indirect land impacts from third-party farmers and suppliers
- Increase business resilience through adaptation.

To achieve these goals, we will:

- Assess relevant risks in our day-to-day supply-chain and direct operations, proposed operational changes, acquisitions and new ventures
- Select and manage land responsibly
- Establish integrated water resource management and encourage water stewardship
- Increase the efficiency of all resources used including fuel, energy, water and land
- Increase the proportion of renewable and non-fossil fuels and energy and the utilisation of by-products consumed in our direct operations
- Reduce any impacts arising from our business activities on the environment and biodiversity through process innovation, and waste elimination, reduction, reuse and recycling
- Implement appropriate climate smart agricultural practices in those supply-chains and direct operations identified as having current or future climate associated risks
- Conduct periodic environmental footprint reviews for all Olam's own operations and its key supply-chain activities
- Encourage and support our suppliers to improve the sustainability of their business
- Create a learning organisation where colleagues can share their successes and failures to drive improvement.

For the management and implementation of this and all policies, we will:

- Conduct our business with integrity and in compliance with the relevant laws of the countries in which we operate and in accordance with recognised international and national standards, guidelines and processes
- Require all levels of Olam management to be accountable for applying the policy in their business decisions
- Ensure all employees, business partners, contractors suppliers and visitors understand this Policy and their own responsibilities and accountabilities and receive appropriate training and support for success
- Establish strategies and management systems to create and prioritise measureable objectives and execute improvement plans that are aligned with our business goals and address our significant risks, impacts and opportunities
- Communicate and publically report meaningful and accurate information regarding our performance to demonstrate continual progress towards commitments made in our policies
- Regularly review this Policy for business alignment including 'Our Shared Values' and key stakeholder expectations.

Annex 2 Olam International's Health and Safety Policy

Health and Safety Policy

Olam is committed to providing a healthy and safe workplace for our employees, contractors and visitors.

Our vision of embedding a 'zero harm culture' is delivered through safety leadership and embodied in 'Our Shared Values'.

Our goal:

- Deliver a world-class safety programme across all Olam facilities, with workplace risk management as a core capability.

To achieve these goals, we will:

- Promote consultation between management, employees, contractors and interested parties on those matters affecting safety and health in the workplace
- Form facility safety committees chaired by the Facility Manager to identify, assess and eliminate risk or implement risk mitigation actions based on risk prioritisation
- Implement a safety management programme based on safe systems of work, including Risk Assessment and Mitigation, Job Safety Analysis and Permit to Work
- Establish measurable health and safety goals and targets supported by processes to accurately measure, trend and report our progress
- Maintain robust conformance assessments using internal and external auditors.

For the management and implementation of all policies, we will:

- Conduct our business with integrity and in compliance with the relevant laws of the countries in which we operate and in accordance with recognised international and national standards, guidelines and processes
- Require all levels of Olam management to be accountable for applying the policy in their business decisions
- Ensure all employees, business partners, contractors suppliers and visitors understand this Policy and their own responsibilities and accountabilities and receive appropriate training and support for success
- Establish strategies and management systems to create and prioritise measurable objectives and execute improvement plans that are aligned with our business goals and address our significant risks, impacts and opportunities
- Communicate and publically report meaningful and accurate information regarding our performance to demonstrate continual progress towards commitments made in our policies
- Regularly review this Policy for business alignment including 'Our Shared Values' and key stakeholder expectations.

CH-4051 Basel
Switzerland
Phone: +41/61 205 39 40

Re: Chain of Custody Contractor Agreement

As part of our chain of custody („CoC“) procedures we are required to have an agreement in place with all outsourced contractors with whom we work.

We would appreciate if you could confirm your agreement to the following by signing and returning a copy of this letter.

We, the contractor, hereby declare that:

- 1.) We have received a copy of the relevant section of Olam International Ltd.'s CoC procedures and are operating in compliance with them.
- 2.) We agree to allow the relevant CoC accredited Certification body to audit our operation if required
- 3.) We will ensure, that certified material supplied by Olam International Ltd. can be tracked and controlled and cannot be mixed during handling of documents
- 4.) We will keep records of goods received, goods dispatched and delivery documentation associated with all certified material processed under this agreement.
- 5.) We will not outsource any procedure without the prior agreement of Olam International Ltd., should this be necessary, the outsourced location will need to be added to Olam International Ltd.'s CoC registration and all relevant procedures adhered to.
- 6.) We shall not use the CoC scheme logos (FSC) in relation to our processing of goods under this agreement unless specifically instructed by Olam International Ltd. to the contrary

Yours sincerely

I confirm that TT Timber International AG, Basel, wood products accepts the above terms in addition to the standard terms of business of Olam International Ltd.

Signed
